

MicroVas

is the remarkable treatment modality with an attractive reimbursement used by **Podiatrists** for many ailments including: **neuropathy; wounds; swelling; edema; sprains; strains; Plantar Fasciitis; Achilles Tendonitis; neuroma's** and more, or used for preventing surgery or for post-op recovery.

Compared to other technologies that only dilate the capillary beds,

MicroVas increases blood flow and raises pressure gradients across the capillary beds by significantly increasing venous return, the primary controller of cardiac output. Not only does it **Increase cellular oxygen levels** within minutes, but levels are uniquely **sustained**, thereby building and providing faster healing results not otherwise seen. **MicroVas** also strengthens muscles by simulating a three mile walk during the 45 minute office therapy.

neuroVasix is the **exclusive worldwide marketer** of the **patented MicroVas** innovation.

neuroVasix is the exclusive worldwide marketer of MicroVas innovation.
